

RFX™ Wireless Indicators

For Use with Any Intercomp RFX™ Wireless Scale System

RFX™ Wireless Handheld Weighing Indicator

40 Hour Battery Life

RFX™ Wireless
PT20™ CPU

200 Hour Battery Life

Intercomp's Next Generation of RFX™ Wireless Weighing Indicators!

RFX™ Wireless Weighing Indicators are available in two convenient options for use with any Intercomp RFX™ Wireless Scale System. Both provide the ability to easily process weight related data for monitoring and controlling loads. USB/RS232 output ensures weight records can be stored and downloaded in a variety of ways and indicators can communicate with a variety of devices, including PC's and displays, wirelessly, saving time and improving safety.

The PT20™ CPU is self-enclosed with a thermal printer in a rugged, all-weather case for use in even the most remote locations and the Handheld Wireless Weighing Indicator offers a light-weight handheld alternative with much of the same functionality as the PT20™ CPU. Both systems free you of cables and enhance performance.
